

Notes regarding the Safe Routes to Schools templates:

- Print the templates to scale as per the size of the PDF files included on the CD.
- It is advisable to print the templates on paper (A3 to A2 depending on the template) and then trace onto hard cardboard, linoleum etc to assist with the painting and ensure no bleeds when painting on footpaths. This process could be shared between neighbouring schools so that final templates are also shared.
- The following images may assist (in addition to the information included in the Road Safety Around Schools Guideline - School Edition):

Below is an image of the template you can create using the PDF files included on the Road Safety Around Schools Guidelines CD.

Below is an image of the stop sign, smiley face and footprints in action. Refer to the *Road Safety Around Schools Guidelines* for further information about placement of the symbols.
